Description

Description

Feather Angled Flags tower over the competition—take advertising to new heights with these full color skyscrapers. With several base options they can be displayed indoors and outdoors.

Our mesh flag polyester is direct printed and then sublimated. This creates "Print thru" for single sided flags; full color and vibrant on the front - muted and mirrored but legible when viewed from the back.

- **Single sided Print Thru** flag graphic with black nylon pole sleeve to the left of the print when viewed from the front
- **Single sided Print Thru Reverse** flag graphic with black nylon pole sleeve to the right of the print when viewed from the front
- **Double Sided** separate flag graphics are sewn back to back with a silver block out layer in between

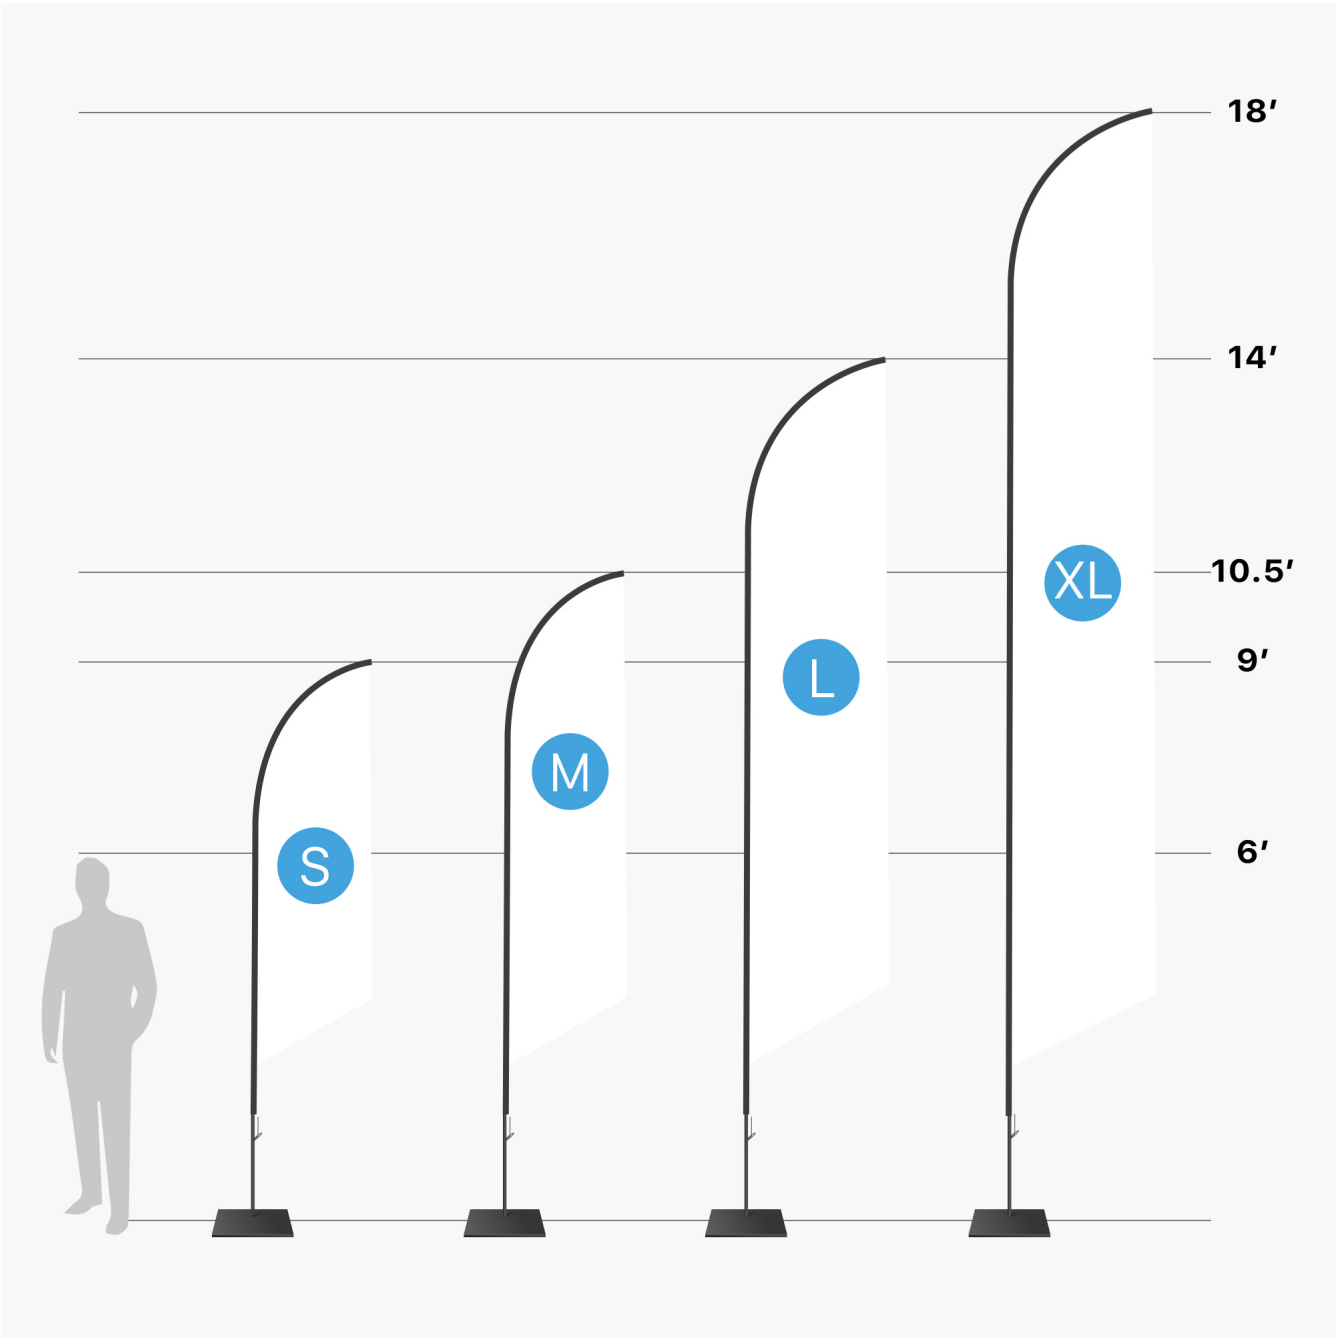

The standard ground stake can be used to install in soft ground, while the cross base or square base are heavy duty for hard surface staging. The optional carry bag is great for when you plan to travel with or store your flag.

Applications

Suitable for both indoor and outdoor settings, ideal for storefronts, tradeshows, outdoor events, and festivals.

Spec

Size & Specifications

Material & Print Specifications

Print Method: Dye Sublimated
